

Workshop

DESIGNING SMART AND EFFICIENT ENERGY POLICIES WITH CITIZENS AT LOCAL LEVEL

21 June 2019 13h30 – 16h Square de Meeûs 1, Brussels

Contact: tfievet@lillemetropole.fr Registration: <https://bit.ly/2H2IkPS>

RATIONAL

Most cities have one or several local programs to help inhabitants and companies save energy. However, these programs often appear technical, red-tape-laden, time consuming with a high degree of uncertainty to reach actual retrofitting and ultimately energy (and money) savings. This session proposes to present diverse local and European projects using new methods to face the difficulties that cities have in designing local energy retrofitting services. New participatory methods are used to make sure programs are in line with people's actual needs and fight difficulties to involve stakeholders and consumers through traditional participatory methods.

💡 GOOD TO KNOW

INTERPRETATION: FR > EN

The focus will be set on the co-creation of these policies and the session will also therefore touch upon governance questions. The afternoon will be moderated by Greenovate Europe, the network of expert in sustainability policies and technologies.

Event will be followed by a networking coffee

PROGRAM

13h30 - Coffee and registration

14h - Introduction by Greenovate Europe!

- Guillaume Corradino, Head of European Programs

14h10 - Projects presentations

AMELIO by Lille Metropole

- Elena Ittura, Lille Metropole, Head of Unit "private housing and solidarity policies"

AREA21 by HafenCity University Hamburg

- Galya Vladova, Project Manager and Researcher

STARDUST by Trento City

- To be determined

15h15 - European trends and opportunities by the European Commission

- Pau Garcia Audi, European Commission, DG ENER

15h30 - Roundtable discussions

16h - Plenary discussion and conclusion
